NOTES

Not sure what your English level is? You can request a phone interview by submitting your email, phone number and comments at info@aftaflightschool.com.

Students at level 3 will work with an Aviation English tutor when they arrive to the US

All international students will join an Aviation English phraseology class.

PROGRAM COST

It is recommended to have funds available before starting your pilot career. One of the major factors in not completing the commercial pilot program is not having the adequate funding when it is needed. The majority of pilots who do not have funds available are obligated to stop flying therefore halting their progress.

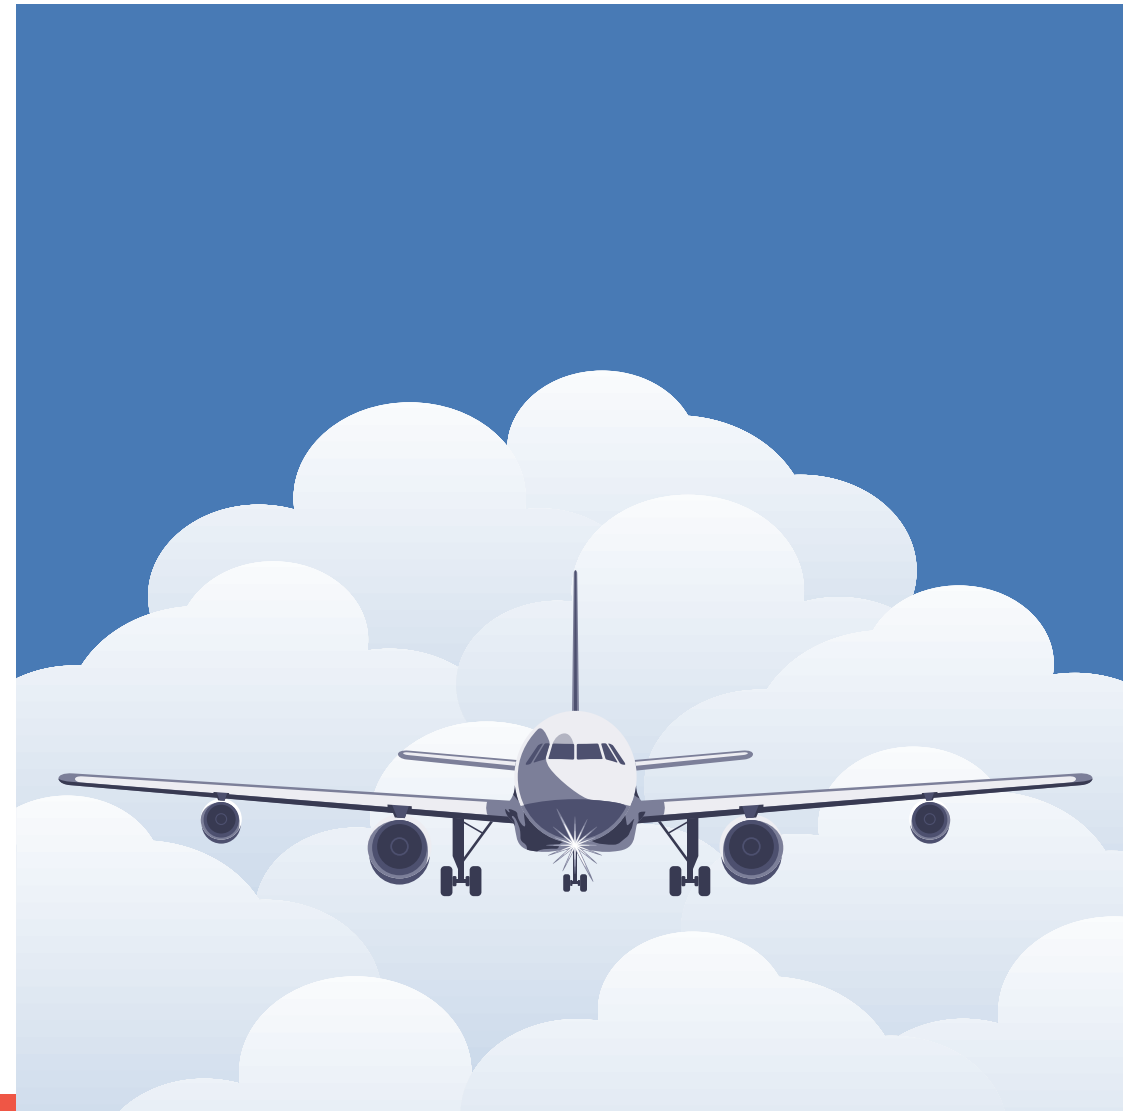

Private Pilot License 7 Weeks FAA Part 61	Instrument Rating 7 Weeks FAA Part 61
USD \$8,995.	USD \$9,118.
This includes all courses, materials, flight time, and fuel.	This includes all courses, materials, flight time, and fuel.
Commercial Pilot Training 9 Weeks FAA Part 61	Commercial Pilot Add-On (Multi Engine) 2 Weeks FAA Part 61
USD \$34,130.	USD \$5,538.
This includes all courses, materials, flight time, and fuel.	This includes all courses, materials, flight time, and fuel.

- HIGH TECH EQUIPMENT.
- BEST EXPERIENCE LEARNING TO FLY.
- EXCEPTIONAL STUDY PROGRAM.
- HIGHLY SKILLED PROFESSIONALS.

Complete your flight hours.

AFTA welcomes all schools and students to come and train with us during the winter months when due to the bad weather it can be difficult to fly.

We offer this program as a joint venture with schools and students allowing for a seamless continuation of study.

HOUSING

MIAMI has some of the best weather in US and therefore makes flight training possible year round.

For only \$200 per week (Local transportation included), Aviation Flight Training Academy offers varied housing accommodations which are conveniently located close to our training facility so that you can concentrate fully on your pilot training and making your stay more pleasurable and hassle free. The housing options includes luxury apartments with many amenities such as the following:

FULLY FURNISHED

- Study desk
- Cooking range microwave
- Full size refrigerators
- Wash & dryer
- Satellite TV
- Telephone Service
- Internet

RECREATION

- Club House
- Game Room
- Fitness Center
- Resort size pool
- Jacuzzi
- Bike Trails

TRANSPORTATION

Aviation Flight Training Academy (AFTA) will provide local transportation to our flight training facility close to the airport and to assigned dining locations during school days and on weekends as Scheduled.

Transportation will also be provided to several recreational activities during select weekends and holidays.

Learning to fly is a large investment of time and money. Finances are definitely a factor to consider. AFTA is an aviation flight training company and not an educational institute, therefore we do not offer financial aid programs to students at this time. However, there are several smart ways to fund your flying.

A few popular forms of reaching your funding needs are using sponsors, loans, scholarships, and student financial aid (Most financial aid option require the student to be a US Resident or Citizen).

Sponsors:

Friends, family, and community organizations often have grants and loans that you can access with the most ease. You will be surprised at how willing family and friends are to support your development.

Loans:

Vocational loans through your bank or credit union are secure ways to finance your education. We are happy to write any enrollment letters or references you may need. Collateralized loans often have the lowest interest rates. If you have equity on your house, car, or cash in a savings account, a bank can loan against that value.

Financial Loans:

If you or your parents have life insurance, retirement funds, or stock accounts, your financial institution may allow you to withdraw money or take out loans with low interest rates from these types of financial assets. Consult with your financial institution to see if you have this option available.

Private Loans:

Aviation or private organizations are very generous for those that reach out and seek help. Go online and look for organizations that want to help minorities or students who want to excel in life.

US Citizens/Resident:

Financial Aid & Scholarships for Flight Training

Make your dreams to fly come true!
